To our patients: Although many of these questions may not seem relevant to your visit today, we ask that you communicate with us regarding symptoms or history you have, as this information can be of great assistance in determining whether therapy is indicated, and to what degree it may be of help. And even if your provider is aware of a symptom or illness, please let us know about it, and also if there has been any worsening of late. An important aspect of treating musculoskeletal injuries is screening for other conditions and factors that may play a role in your symptoms; this helps us to provide effective interventions, and to be advocates for your overall wellbeing and health.
